Linh Xuan W., Ho Chi Minh City (prev. Linh Trung W., Thu Duc)

ABOUT ME

I'm a Software Developer with 3 years of experience in backend development, mainly using Go. I'm also familiar with Java, Node.js, Python and microservices architecture. Additionally, I have experience working with AI tools and applying critical thinking to validate AI-generated outputs. I enjoy learning new technologies and finding better ways to build great software

SKILLS

- Go (Golang), Fiber, Echo, Gin, GORM.
- Java, Spring Framework, JPA/Hibernate, Thymeleaf.
- MedusaJS (headless e-commerce platform built with Node.js)
- PostgreSQL, MySQL, MongoDB, Redis.
- Microservice, REST, gRPC, RabbitMQ, NATS, Bytebase, Apache NiFi (ETL)
- Docker, Git, CI/CD.
- Design Pattern, S.O.L.I.D, Clean Architecture.
- AI Tools (ChatGPT, Copilot, etc.) and validate AI-generated outputs.

EXPERIENCES

Backend Developer

TTC AgriS

AgriOS Platform – Marketplace Service

Oct 2025 - Now

- Designed and implemented core gRPC-based product APIs, achieving sub-200ms response times through Redis-based caching and optimized query patterns.
- Developed a dynamic pricing configuration engine supporting region- and station-level overrides, enabling flexible price control without code changes.
- Built a scalable File Upload Service with real-time image compression, cutting AWS S3 storage costs by approximately 20%.
- Architected an asynchronous notification pipeline using Golang, RabbitMQ, and FCM, designed for high-throughput workloads and horizontal scalability.
- Contributed to system-level design decisions to improve fault tolerance, scalability, and performance across marketplace services.

Backend Developer

FUTA GROUP

Goopay Wallet | goopay.vn

May 2024 - Oct 2025

- Developed reporting APIs for the SIMO system of the State Bank of Vietnam.
- Visualized financial data and reports using Metabase and Bytebase .
- Built alerting features and automated ID document expiry tracking (for Citizen ID/passport).

- Participated in designing and developing APIs for the MVP phase, focusing on an agriculture-focused C2C marketplace.
- Extended the platform into a C2C e-commerce model with features including shopping cart, order management, shipping, and push notifications.
- Optimized system performance, ensuring 90th percentile API response time under 200ms.
- Adopted a microservices architecture using Go, PostgreSQL, Redis, RabbitMQ, and gRPC for high-performance communication.

Distribution Hub

- Designed and developed a retail distribution system for third-party services, including bus tickets (Futabus) and travel insurance (Bao Viet).
- Built a service gateway to centralize partner requests, implementing signature-based authentication and idempotency for reliable transaction handling.

Backend Developer Intern

DatVietVAC Group (VieON)

July 2023 – Nov 2023

- During my work experience, I have received training in the Go programming language and various frameworks for developing web backend applications.
- I participated in developing APIs for a partner website of VieON and interacting with other services in a microservices architecture to build applications.

FREELANCE

AIDE – Learning Platform for Dental Medicine Students

| aide edu.space

AI-powered medical training tool for dental students

- Developed a web application integrating ChatGPT API to simulate virtual patient interactions.
- Designed and implemented the backend using Go, PostgreSQL for data persistence, and Redis for caching session data and improving performance.
- Implemented a rule-based evaluation engine to score diagnostic steps, with real-time personalized feedback generated via ChatGPT.

CERTIFICATIONS

- Spring & Hibernate for Beginners – [Udemy](#).
- Google Cloud Big Data and ML Fundamentals – [Coursera](#)
- TOEIC – IIG

EDUCATION

Information Technology – Distinction

- HCMC University of Technology and Education (2020 – 2024)

ACHIEVEMENTS

- Silver & Bronze Medals in Informatics – Ho Chi Minh City Olympiad April (2019, 2018)
- Third Prize & Consolation Prize – Tra Vinh Young Informatics Competition (2019, 2018)
